SUMMARY

I am an Informatics Engineer specializing in Artificial Intelligence, with a passion for combining user interface development with intelligent data processing. I have expertise in React.js and machine learning algorithms, and I strive to bridge the gap between complex AI models and user-centric web applications.

PROFESSIONAL EXPERIENCE

Frontend Developer (Volunteer) 02/2025 – 08/2025
The inspires Association Damascus

Transforming Figma design systems into responsive React components in collaboration with a technical team to enhance user experience.

Data Annotation Specialist (Freelance) 05/2024 – 10/2024
SOD (Russian Technology Company) Remote

Analyzed and processed medical images to prepare them as training datasets for artificial intelligence models. Used Slicer tool to accurately identify pathological patterns to ensure the efficiency of diagnostic algorithms.

EDUCATION

Bachelor of Science in Informatics Engineering - Machine Learning 2021 – Present
Syrian virtual university Damascus, Syria

Final-year student specializing in Machine Learning.

Bachelor of Science in Economics 09/2021 – 07/2025
Damascus University Damascus Syria

SKILLS

Programming Languages

Python, JavaScript (ES6+), TypeScript, HTML5, CSS3

Web Technologies & Frameworks

React.js (Vite), Tailwind CSS, Bootstrap 5, Next.js

Tools & Methodologies

GitHub, Jira, Figma, Postman, WebStorm, Google colab

TRAINING COURSES & CERTIFICATES

AI Chatbot Training Program 04/2026 – 08/2026
MozaicAI Germany & Syrian AI Association

Four-month practical training program focused on building AI chatbots, incorporating a startup competition and hands-on experience on the OMRAN mini ERP project.

Frontend Web Development - React.js & Vite
Vica Web Solutions, 2025

Machine Learning
Advisors Team, 2026

PROJECTS

• **OMRAN – AI-Powered Construction & Renovation Management ERP** 04/2026 – 08/2026
MozaicAI & Syrian AI Association

Tech Stack: Next.js, React, FastAPI, PostgreSQL, Tailwind CSS, AI Chatbot Integrations

- **Frontend & UX Engineering:** Developed interfaces for a digital management platform consolidating clients, proposals, tasks, materials, photos, and invoicing into a unified workspace.
- **AI Chatbot Integration:** Implemented conversational AI flows to analyze client requirements, generate draft proposals, retrieve project context, and flag potential execution delays.
- **Human-in-the-Loop Control:** Ensured AI-generated outputs require explicit user confirmation before committing to ERP records, alongside tenant-isolated security.

• **Startup Weekend Syria** 04/2026
Participant / Team Member

- Collaborated with a multidisciplinary team to ideate and build a 'Backend as a Service' MVP within a 54-hour intense startup competition, focusing on frontend development and rapid prototyping.
